

HEATER RESISTOR - FINAL STAGE RESISTOR – HEDGEHOG

This part is commonly used on the **E36, E46, E39 & E53 X5** models. It is compatible with cars fitted with Electric Climate Control and Automatic A/C.

Common symptoms of a faulty unit are:

- An erratic fan speed in spite of the setting chosen on the control panel.
- A fan which runs on after the ignition has been turned off.
- No response from the control panel whatsoever.

This unit has been modified several times by BMW and is now smaller in design and has more prongs which provide a more efficient heat sink.

We supply a BEHR HELLA unit priced at £38.40 including vat
